

Hello

I support this bill!

We are trying to keep open space and save the country feel of CT!

Recreation is an asset. Many golf courses have gone bankrupt or sold off for other development - beautiful open space land gone forever. Please Connecticut preserve that country charm and open space!

Golf industry has hardships enough with being seasonal With the addition that the golfer is pretty moody about the conditions he/she plays in :) You know- it's too hot. Too wet too windy too cold. Yada yada you get point!

Another point is

How can a public course compete with a municipal course that can charge less. Municipal courses don't pay taxes please help our struggling industry Please make this right. Support SB970

Thank you
